chaudharyharshit9@gmail.com | +91-9650782602 | Portfolio | GitHub

## EDUCATION

### AKGEC

#### B.TECH IN COMPUTER SCIENCE

2018-22 | Ghaziabad

CGPA:8.36

## SKILLS

### LANGUAGES

Go • Rust • Python • Ruby  
C++ • JavaScript • SQL

### INFRASTRUCTURE

Kubernetes • Docker • Kafka  
Redis • PostgreSQL • AWS

### AI

LLM Pipelines • Prompt Eng.  
LangChain • LangGraph  
Langfuse • VertexAI  
OpenAI • Gemini • RAG • VectorDB

### FRAMEWORKS & TOOLS

Node.js • Ruby on Rails  
Prometheus • Grafana  
Sidekiq • BigQuery

## OPEN SOURCE

12 merged PRs across 8 repos:

- **Grafana Tempo** — storage config
- **Lima VM** — CLI flag fix
- **Maybe Finance** — 4 PRs
- **CocoIndex** — LMDB config
- **RubyForGood** — 2 PRs

## ACHIEVEMENTS

- **Vortex** : 420+ GitHub stars, published on crates.io
- Solved **700+** on LeetCode
- CodeChef rating **1900**

## EXPERIENCE

### BROWSERSTACK | SOFTWARE ENGINEER – BACKEND (AI)

December 2024 – Present | Mumbai

- Architected and built BrowserStack's **AI accessibility agents** — Issue Detection Agent, Remediation Agent, and Design A11y Color Contrast Agent on the **Spectra™ rule engine**, covering **40+ WCAG criteria** across web, mobile, and design.
- Designed multi-model **LLM inference pipelines** (Gemini, GPT-4, Claude) with **semantic DOM chunking** for parallelized website analysis; achieved **87.69% heading detection accuracy**, reduced color contrast manual review by **~80%**.
- Built **App A11y Issue Detection Agent** for Meaningful Visual Order and Reading Order; reduced false-positive rates by **64%** across 4 LLM providers while cutting **P90 latency from 20s to 10.1s**.
- Led **TestOps observability integration** across 7 AI features as SPOC; designed Redis-based **phased rollout** (0%→30%) with probability gating; managed K8s Kafka consumers with auto-scaling.
- Built **Test Case Generation Agent** using **LangChain + LangGraph** for automated test case authoring from requirements; integrated **Langfuse** for model evaluation, accuracy tracking, drift detection, and false-positive management across AI accessibility agents.
- Triaged **15+ P1/P2 production incidents** (OOM crash loops, Kafka lag, LLM 429s); implemented VertexAI provisioned throughput, GenAI SDK migration, and infra fixes.

### PROCOL | SENIOR SOFTWARE ENGINEER

June 2022 - December 2024 | Gurgaon

- **Led a team** (3 members) to productise the ERP integrations.
- Core engineer on the Lighthouse and Checkmate team, responsible for **Architectural decisions and Quality Assurance** for the Procol platform.
- Set up RSpec testing framework, **achieved 52% code coverage** and impacted team practices.
- Designed and implemented a **form system as the core data source layer** for all Procol microservices( Currently, integrated with 3 main layers).
- Developed **Flexi data source and view**, inspired by Notion, eliminating the need for repetitive development for user-specific requests
- Led ERP integrations(SAP, Oracle), resulting in a **25% increase in product value** and successful onboarding of enterprise clients.
- Contributed to successful Rails 7 and Ruby 2.7.8 platform migration.
- Tech Stack: **Ruby on Rails, PostgreSQL**

### HASHEDIN BY DELOITTE | SDE INTERN

January 2022-June 2022 | Bangalore

- Designed REST APIs for Parking Management System with JWT Authentication; Tech Stack: **Django REST Framework, PostgreSQL**

## PROJECTS

- **Vortex** (420+ Stars) — Terminal UI for WireGuard and OpenVPN with real-time telemetry and leak guarding. **Crates.io**
- **Mercury** — Native API client in **Rust**; 6 MB, <300 ms startup, 60fps UI (vs Postman's 500 MB / 3-5s). Keyboard-first, plain-text file sync. **Docs**
- **AFK** — Developer break reminder in **Tauri + Rust**; 20-20-20 rule, fullscreen reminders. Under 5 MB.
- **UPPCL Pro** — Reverse-engineered a government electricity provider's undocumented API; built usage forecasting and cost breakdown.**Link**.
